News from the Stars:

OR, AN

EPHEMERIS

For the YEAR, 1679.

With *Astrological Judgements* upon the several *Eclipses*, *Positions*, and *Configurations* of Heaven, happening therein.

WHEREIN

You have a perfect and brief Account of the most material Matters and Things intended by the *Heavens*, to be manifested in the WORLD in the same YEAR.

BEING

The Third from *Bissextile*, or Leap-year: And from the CREATION of the WORLD, 5628 Years.

By WILLIAM ANDREWS Student in *Astrology*.

Sine ope divina nihil valemus

London, Printed by *J. Grover* for the Company of Stationers.

Multa judicari possunt expositu Astrorum de valetudine Corporum, de ingeniis & inclinationibus, deque multis in vita casibus, de tempestatibus, de mutationibus Rerum publicarum. Melanchthon in præfat. ad Schonerum.

To the Reader.

BY *the goodneſs of* God, *I have juſt paſſed over my* Climacterical Year *of* 42. *being a year which often times produceth ſome great* Change *or other in the Life of* Man: *eſpecially when bad* Directions *are then operating in a* Nativity.

I do here write of the year of Chriſt, 1679. *now at hand; being from the* Creation *of the* World (*if we may believe* Chronologers) 5628. *years. God grant it may be a* Comfortable *and* propitious Year, *unto all* Chriſtendom.

The publique Tranſactions of Europe *ſtand much unſetled, and in ſomewhat an uncertain poſiture at the writing hereof: and great turnings and windings appear in very many of the Grand Concernments of theſe parts of the* World —— *If in this year* 1679 *there be a firm and* General Peace *in* Europe *it will be well, &c.*

God Almighty *protect and proſper His Majeſty of* Great Britain *in all His Affairs and Deſigns, now and ever.* Amen.

William Andrews.

Radwinter, near *Saffron Walden* in *Eſſex*, *Aug.*8. 1678.

30	Number of Direction.	33

The use of the Two ensuing Tide-Tables.

TO find the time of full Sea, or High-water in any of those places mentioned in the two ensuing Tide-Tables, you must observe, First the Age of the Moon, which you may easily find in the next following Table, wherein you have the Moons Age every day throughout this year, 1679. And having therein found out the Moons Age, according to those directions mentioned for that purpose, in the side of the said Tables: Then have recourse unto the said Tide-Tables, and look for the place desired, in the Head of the said Tables, with the Age of the Moon, in the Column under the Title of the Moons Age, and in the common Angle, or meeting of those Lines, in the Column under your place, you shall have the time of High-water in Hours and Minutes.

Yet *Note*, that the Tides do not always fall out exactly at the time found in these Tables, by reason of the difference of the Moons Latitude, high Winds, Land-floods, &c. which do very often alter the time; yet this is the exactest Rule that can be given for the finding of them

A

A TABLE of the Moons Age every day throughout this Year, 1679. whereby, with the help of the ensuing Tide-Tables, the time of high Water and full Tide may be found in those places there inserted.

THE Stars appear in no ſettled Poſiture; and ſome Matters in the World meet with obſtructions and Difficulties. The Publick Affairs of ſome Countries ſeem ſomewhat unſetled—— Several reports are ſpread abroad, touching ſundry Negotiations now in agitation—— Controverſies and debates, if not ſome Martial Action of conſequence. *Italy*, *Rome*, *Sicily*, *Bohemia*, part of *Turkey*, *Tartaria*, *Moſcovia*, *Valachia*, the South part of *Swedeland*, *Piedmont*, part of *Bavaria*, *Hamburgh*, *Trent*, and other places nearer hand, ſeem by the Stars now hinted at. The minds of people unſetled and unconſtant, expecting ſomewhat of importance, to be near manifeſtation in ſome Countreys—— The general Actions of the World being managed and carried on with a pretty high hand, for the time of the year. Some ſuddain Fires, or unruly Actions may prove detrimental to the Inhabitants of ſome place or places, which God prevent——— Skirmiſhes, the Souldier is not idle, but ſeems imployed in ſome foreign parts, &c.

Windy weather in this Month, and pretty cold and ſharp Air; perhaps alſo ſome claps of Thunder in ſome places——

First quarter the 7 day, 29 min. past 2 after noon.
Full Moon the 15 day, 31 min. past noon.
Last quarter the 23 day, 29 min. past 2 after noon.
There is no New Moon in this Month.

M. D.	W. D.	Festival Dayes and change of Weather.	☉ ♒	☽ ♓	Planets mutual Aspects.
1	d	Fast.	23	5 0 30	Sun riseth 7. 16.

28	c	time.	20	12 23 32	

Jupiter is now come again into *Aries*, and *Mars* and he are at this time friendly diſpoſed —— Some National Differences are near a Reconciliation; and the preſent temper and diſpoſition of ſome Countreys are pretty moderate. No great Action: however, many Mighty Matters fall now under conſideration. Several *Miſſives*, *Agents*, *Ambaſſadors*, *Addreſſes*, *&c.*——arrive in ſome Countreys of *Europe* near this time. An active people buſie in proſecuting their preſent Affairs and Deſigns. Some perſons ſeem troubled and out of order. No great certainty in Humane Affairs. Some *City* or *Cities* (perhaps) ſenſible of ſome ſuddain caſualty—— Talk there is of Action drawing nigh in ſome places, or that ſundry buſineſſes of publick concernment will be e're long carried on in ſome parts of *Europe*—— The Stars now have relation unto *Flanders*, *Brabant*, part of *Lombardy*, *Normandy*, *Portugal*, *Spain*, *Bruges*, *London*, *&c.*—— and other places under *Gemini* and *Piſces*—— *Saturn* is now *Stationary*. The weather this Month will appear pretty ſeaſonable: perhaps ſome Snow once or twice therein——

March

New Moon the 2 day, 50 min. past 8 morning.
First quarter the 9 day, 50 min. past 3 morning.
Full Moon the 17 day, 11 min. past 4 morning.
Last quarter the 25 day, 18 min. past 3 morning.
New Moon the 31 day, 35 min. past. 5 at night.

MARS is now *Stationary* unto *Direction* in *Leo.* Thoſe Tranſactions which in the Months paſt were but clandeſtinely managed, ſeem now more openly proſecuted. Martial actions and undertakings ſeem diſcourſed of. The motion of Armies, &c. However, the *Configurations* of *Heaven* are of a *propitious nature now:* and divers Countreys in the *European* part of the World ſeem to ſtand in a quieter poſiture than formerly; ſeveral Nations being of a mild and ſerene Diſpoſition. *Venus* and the *Sun* joyns now with *Jupiter* in *Aries.* The *Engliſh* Affairs proſpers. A hopeful Spring draws nigh. Notwithſtanding ſome War-like Stratagems now in agitation in ſome places. Debates and Controverſies ſeem to be near a happy concluſion; and the affections of people appear more inclined to Peace than War—— News from *Ireland*, *Lorrain*, &c.——— The *Poliſh* Affairs ſomewhat concerned——— There happens, as unto us, an inviſible *Solar Eclipſe* on the laſt day of this Month, in the 21 Degree of *Aries*, being almoſt Total, whoſe Effects may prove very conſiderable in one kind or other, unto thoſe Countreys and places under the ſaid *Conſtellation*----

Acceptable weather in this Month, and ſutable for the Seaſon.

April

First quarter the 7 day, about 7 at night.
Full Moon the 15 day, 32 min. past 8 at night.
Last quarter the 23 day at noon.
New Moon the 30 day, 27 min. past 1 morning.

THE Actions and Negotiations of theſe Times ſeem to appear not very rough or unquiet—— Here are ſome favourable and ſerene Aſpects, and Configurations of the Stars in this Month: And the Heavens ſmile upon the Affairs of ſome Countreys and Cities under the Conſtellations of *Aries* and *Gemini*——— and ſeem to have a good ſignification unto *Flanders*, *Brabant*, and places adjacent, as to their publick concerns——— Sundry *European* Nations now ſtand in an indifferent Condition. The *Citizens* of *London* thrive and proſper; and the Merchants undertakings ſeem ſucceſsful, &c.——

Here is a *Sextile* of *Saturn* and *Jupiter*—— Great endeavours are on foot, to continue and fix a right and peaceable underſtanding betwixt divers Countreys: and buſineſſes of a comfortable Nature, may appear in many parts of the World.

However, ſomewhat of conſequence ſeems to be on foot in *Italy*, *Rome*, *Poland*, *Turkey*, &c. from thoſe parts come ſeveral Reports, as alſo from *France*, *Germany*, *Denmark*, *Sweden*, *Flanders Brabant*, *Lorrain*,—— the Stars now having ſome relation unto thoſe Countries tranſactions———

Good weather for the moſt part of the Month: Some ſharp claps of *Thunder* about the 25, 26, or 27 days thereof.

First quarter the 7 day, 7 min. past 11 before noon.
Full Moon the 15 day, 26 min. past noon.
Last quarter the 22 day, 51. min. past 4 afternoon.
New Moon the 29 day, 28 min. past 11 before noon.

DEath or Discontent now seises upon some *Eminent* person of the *Female Sex*——*Jupiter* now leaves *Aries* and passeth into *Taurus*, and *Mars* goes (about the end of this Month) out of *Leo* into *Virgo*——The affairs of the Kingdom of *Poland* proceed in an handsome manner, and the *Poles* are active.——The Kingdom of *Ireland* in a happy condition, *&c.* notwithstanding all various discourses——Some murmurings and repinings in a City under *Gemini*, and sundry Reports from *Flanders*, *Brabant*, *France*, *Spain*, *Portugal*, and other *Foreign Countries*, *&c.*——The Sword seems not very busie, yet the motion of Armies and Soldiers appear in some places, and probably some *Martial* Action draws nigh in the *South* and *South-west* parts of *Europe*.——Perhaps some Nations are endeavouring to invade one anothers Territories. A Country and City beyond Sea seem somewhat alarm'd——yet the *Stars* still move quietly, and some *benevolent Configurations* may have some *eminent Operation* about these times——Pleasant weather the most part of this Month, some *Cold Storms*, *&c.*——About the *second Week* thereof——And also *Windy* or some *unconstant Weather* in the *last Week*, *&c.*——

First Quarter, the 6 day at 4 in the morning.
Full Moon, the 13 day 15 minutes past midnight.
Last Quarter the 20 day 11 minutes past 9 at night.
New Moon the 27 day 2 minutes past 10 at night.

THis Month the Planet *Saturn* leaves *Gemini*, but before that the *Sun* and He are in *Conjunction*——Afterwards He enters *Cancer*, *viz.* on the 23d day.——Some Countries and Cities under *Gemini*, formerly possessed with fears and vexations, now seem almost freed therefrom; and their publick transactions pass on smoothly. Some *Eminent Person* or *Persons* in *Europe* either pass out of this world into another, or else seem now melancholy and in an unpleasant Temper.——Matters of moment are about carrying on in some Countries, and very material passages happen. Considerable things are talked of, touching the present proceedings of some Nations, and some Crosses, Difficulties, *&c.*——are almost ready to attend some places *Northward* and *North-East* from *England*——

Many aged people Die, divers Persons leave their Countrey or Habitations, and betake themselves to other Countries; or are removing out of one place or Countrey into another——*Scotland*, *Holland*, *Zealand*, *Venice*, *Constantinople*, *Tunis*, *Algiers*, *Tripoli*, *The West Indies*, *Amsterdam*, *York*, *&c.* seem concerned by the *Removal* of *Saturn* into *Cancer*——

There will be various Weather, or much wet in or about *Whitsun-week*: The rest of the Month will prove seasonable enough——

First quarter, the 5 day 54 minutes past 8 at night.
Full Moon, the 13 day 59 minutes past 9 morning.
Last quarter, the 20 day 5 minutes past 1 morning.
New Moon, the 27 day 34 minutes past 10 before noon.

SOmewhat of Consequence of a rugged Nature seems near manifestation in some Regions and places *Northward* and *North-East* under *Cancer*: For some time the effects of *Saturn* will operate amongst them——The *Configurations* of *Heaven* at this time appear considerable, and the *Stars* do very often now treat and concern themselves one with another: Sometimes being of a serene constitution, and at other times roughly disposed——A time of no great Trading in some places. Many Reports from the *North* (and from some of those places mentioned by me in the last *Months Observations*;) about *Matters* of publick concernment. *Martial* Action towards the end of this *Month*, and Sea matters are coming into consideration——The people of *Algiers*, *Tunis*, *&c.*——smart for their unhandsome Carriage towards some Nations——The *Venetian* sensible of loss. The affairs of that City somewhat unsettled. Some discourses touching *Ireland*, *Italy*, *Rome*, *Poland*, the *Turks* Dominions, *&c.*——Some Battle or Skirmishes this Month——

Unsettled weather and sudden storms often in this Month of *July*, with some considerable Claps of Thunder also.——

First Quarter, the 4 day 9 minutes past 1 afternoon.
Full Moon, the 11 day 18 minutes past 6 afternoon.
Last Quarter, the 18 day 6 minutes past 8 morning.
New Moon, the 25 day 17 minutes past 1 morning.

A Perfidious people somewhat dissatisfied, and a wilful and disobedient Nation would endeavour now to thwart the Authority they live under. Commotions and unruly proceedings, seem talkt of——Matters in some places stand somewhat dubiously. Considerable obstructions happen in publick Negotiations, and a pretty busie time appears, as unto the transactions of some Countries. Some Nations being not very well pleased with the proceedings of their Neighbours, whose former deceitful dealings are now sufficiently had in remembrance——Several matters are now under debate in or about the *Low Countries*——

The Grand Actions of these times do shew themselves a little uncertain. Some news still abroad touching the various concerns of some *Septentrional Countries*, and also the *Dutch* affairs: *Venice* and the *Turkish* Dominions hinted at——*Ireland*, *Poland*, *&c.* enjoy a moderate time. In this Month expect now and then unconstant weather——

First quarter, the 3 day 55 minutes past 4 morning.
Full Moon, the 10 day, 38 minutes past 2 morning.
Last quarter, the 16 day, 20 minutes past 6 at night.
New Moon, the 24 day, 58 minutes past 5 at night.

THe *Heavenly Bodies* are variously disposed, and some very *Notable Configurations* of the *Stars* do now manifest themselves——*Mars* and *Venus* oppose *Jupiter*, and *Mercury* and the *Sun* are in Quartile of *Saturn*——Some difficulties do arise in the publick Transactions of some Countries. And much discourse there is of *Maritime* Businesses. Those people whose Employments are chiefly on the Seas, meet with some considerable *Obstructions* or *Casualties*: Perhaps Action at Sea, or matters in hand touching Sea Affairs. Many Reports again from *Scotland*, *Holland*, *Zealand*, *&c.*——as also from *Ireland*——The *Polander* and also the *Turk* and *Venetian* again concerned. Commotions and Troubles in some parts of the World, possessed by those people——Some places seem startled, somewhat is to do in *Austria*, and those Countries near unto it. Perhaps some Battel at Sea or Land, or hasty and unruly designs——Animosities amongst Superior Persons, *&c.*——

Many *Storms* at Sea and Land, or much *wet weather* this Month——

October

1679. October hath xxxi days.

First quarter, the 2 day, 42 minutes past 6 at night.
Full Moon, the 9 day, 19 minutes past 11 before noon.
Last quarter, the 16 day, 42 minutes past 8 morning.
New Moon, the 24 day, 34 minutes past 3 afternoon.

THis Month passeth on moderately, but in the next the Stars are busie to Purpose. The Actions and Negotiations of these times, are of no very sturdy nature, and some people begin to conceive that all is not got by quarrelling and contention——

Obedience is better than Sacrifice——

Mercury and *Venus* joyn now with the *Sun*: and *Mars* is in *Trine* of *Jupiter*. Some unquiet matters a little while ago on foot in some Countries, seem now not very much prosecuted, but for the present are at a stand; and many sober persons begin to determine, that Peace is better than War.

The minds of people are pretty well setled, and the affairs of divers Nations seem to stand in an indifferent handsome posture. Little or no Action of Consequence this Month, yet some matters of great importance are drawing nigh——

The weather proves sutable enough, sometimes very wet: We shall have a very great Flood this Month——or at the beginning of the next, &c.

December

Full Moon, the 7 day, 12 minutes past 9 morning.
Last quarter, the 14 day, 38 minutes past 10 at night.
New Moon, the 22 day, 29 minutes past 10 at night.
First quarter, the 29 day, 23 minutes past midnight.

Astrological Judgments, For the Year, 1679.

By William Andrews, Student in *Astrology*.

Observations on the *Great Eclipse* of the *Moon*, the 19th day of *October*, 1678.

Shall begin this my present *Discourse* of the year 1679. with that Eminent *Eclipse* of the *Moon* in *October*, 1678.— Intending here (by Gods assistance) to give the World some Account of its Effects, and portents, (according to my

my promise in my last years Observations) they ha
viz. in this year, 1679. principally designed to
and appear——

This *Eclipse* being very *great* and *considerable*, in
cannot but be expected to be the same; and its *dura*
4 hours and about 29 minutes, so will they continu
about 4 Months and an half, from the time of their
ginning to operate: for how many hours the *Sun* is
so many years will the Effects thereof continue; bu
a *Lunary Eclipse* (as this is) so many Months. *Cujus*
(as one very well observes) *Quia Sol in Anno, & Luna*
se, Circulos suos peragrant: and their *operation* cannot
ferred from their *Apparition*, above twelve Months
days. This is *Ptolomy*'s doctrine, which most Authors
And as unto the time when the *effects* of an *Eclipse*
of all begin to manifest themselves, we are to consid
middle time of the *Eclipse* how far the *Luminary*
distant from its rising, and how long it continues
Horizon; which had, we are to reduce them into minu
then to make operation by the *Golden rule*, or *Rule*
and say, If the whole continuance of the *Luminary*
bove the *Horizon* give 365 days, or one whole year
shall the time from its rising give? which by mu
and dividing, the *Quotient* will yield our define——
Origanus in *part* 3. *cap.* 2. *de Effectibus*, *fol.* 466 seems
ple the aforesaid *Doctrine* of *Ptolomy* touching this
these words; *verum cum quari possit, ubi effectus Eclip*
dim lateat, & post tantum tempus demum sese exerat, non
hac Ptolomaica doctrina in dubium trahitur. Consentaneu
que est Eclipses statim operari, & effectus suos aliquos
tendere.

I do proceed and say, That this aforesaid *Eclipse*
Moon, falling in the 6th *degree* of *Taurus* very near
place of the *Comet* in *April*, *&c.* 1677. it may pro
more *significant* and *remarkable* in its *effects* and
and may in some measure give intimation that some
Comets effects, will be manifested during the continu
the *effects* of this *Lunar Eclipse*—— The *effects* of this

will be of some considerable importance unto some Countries, as divine providence shall now, or hereafter, cause them to be manifested; for it is to be noted, that the *effects* of *Comets*, or *new Stars*, as well as of the great *Conjunctions* of the *Planets* do not usually determine suddainly, but may remain in force for some years after their appearance. *Corpora Cœlestia non agunt in instanti, sed in tempore.* There must be *Coition*, and *Conception*, before there can be *Generation*, and *Production*.

The *Moon* at this *Eclipse* being so near unto *Caudæ draconis*, *viz.* in *Partile* and *exact* Conjunction, seems to be of no good signification; the *Moon* being thereby much afflicted: and this is of some untoward importance unto those Countries, Persons and Things concerned by the sign *Taurus*, the sign *Eclipsed*, it being the very *Constellation*, wherein the *Moon* is *exalted*: from hence we may rationally predict, that some Countries and places concerned by the aforesaid *Constellation*, will now and then meet with many difficulties in their publick *Negotiations*, and some rash and unruly Actions may break forth in them; and the common people in those *Countries* subject unto the sign *Taurus* especially, will (in all probability) be of a rough Carriage and behaviour; obstinate and cross in their Actions and proceedings; mutinous, or rebellious, or given to murmuring or repining at their Superiours. The *effects* of this *Eclipse* will operate very much in *Poland*, or upon that Kingdoms Affairs; and some difficulties the *Polander* will labour under, during the continuance of its *effects*: and its greatest *Obscuration* being in the 11th house of *Heaven*, it imports Treachery and deceit in the world, that Men will not be faithful one to another, and that the hopes and expectations of some people will be wholly frustrated. Friends will prove false, and those that are, or shall be imployed in the publick Affairs of those *Countries* under *Taurus*, will not Act their parts with that sincerity and integrity as they ought to do. It further declares, that the hopes, confidence, and intentions of some *vulgar men*, or *common people* in some *Regions*, will be disappointed, and come to nothing—— That one *Nation* or

Country, will be ready to break their League, or Amity another, from whence will arise debates and controversi There will be little or no friendship amongst divers pe Besides, seeing *Taurus* is a four footed Sign, or a *Consi on* which hath relation unto four footed Beasts, *viz. C Oxen, &c.* This *Eclipse* therefore also importeth detri unto the greater sort of *Cattel*, or that during its *effect* ny Cattel will Perish, to the hinderance and loss of th *dustrious Farmer:* and this seems to relate unto the K dom of *Ireland*, where some considerable loss or dec Cattel seems by this *Eclipse* signified to happen: and w said *Eclipse* is in an *Earthly* sign, so it declares scarc Provision, or Barrenness of the *Earth* in those *Countries* w *Taurus*: scarcity of Grass, Hay, or Corn, and as *Sat* in the 12th House *Retrograde*, at the *middle* time of *Eclipse*, it intimateth that some cross or peevish design malitious plots or contrivances, may be by some *vulga* sons carried on or attempted, and that those who shall b indiscreet, as to appear of a thwarting nature, shall s thereby and be imprisoned, afflicted, and undergo m trouble. Men will endeavour to undermine their Ne bours, or malitiously and secretly inform against them, those people and places under the sign *Gemini*, the sign sesing the *twelfth* house of *Heaven* at this *Eclipse*, will be quite exempt from troubles; but will be often of doubts and vexations, mistrustful, and now and then ble unto suddain disturbances and obstructions in their p lick Negotiations, and when least expected, will rec detriment, in their grand Affairs and Transactions ——

The *Moon* at this *Eclipse* being in *square* of *Mars*, and then posited in *Leo* a *Choleriek sign*, foreshews many R beries to be committed on the high-wayes, and also some *Martial* Actions and unruly passages will be manifes in those places, under that *constellation* ere long: *Italy*, *Ro Sicily*, and some of the *Turks Dominions*, *&c.* seem here hinted at, and are in some measure concerned —— And the *sign* wherein the *Eclipse* was, *is fixed* and *solid*, so it m import the decay and ruine of some Ancient Foundatio

d buildings: And those *persons* who in their *Nativities*, *Revolutions*, have the *Sun*, *Moon*, *mid Heaven*, *Ascent* or *part of fortune*, in the 6th or 7th degree of *Taurus*, *Scorpio*, *Leo*, or *Aquarius*, shall in one kind or other participate of this said *Eclipses* influence—— Yet the *effects* of *Eclipses* operate more forcibly on *Cities*, *Kingdoms*, and *Provinces*, than on particular persons, or of private condition, or upon Kings and Princes; for they rather respect the multitude, according to that of *Cardan*, Segment 5. Aphorisme —— *Eclipses Luminarium super Civitates, provincias, & regna magis quam super privatæ Conditionis homines, aut etiam super Reges, respiciunt enim multitudinem.* Now the People, Kingdoms, Cities, and Countries hereby concerned are these, viz. *Russia*, *Polonia*, *Swedeland*, *Lorrain*, *France*, *Bononia*, *Italy*, *Norway*, *Sicily*, *Algiers*, *Westphalia*, *Tartaria*, *Bavaria*, *Rome*, *Paris*, also *Ireland*, *Brandenburgh*, &c—— For the *effects* of this *Eclipse* will operate variously, and in different places, but especially, they will most appear in those under the sign *Taurus*. *Eclipses Luminarium maximè agunt in illas Regiones, quæ sunt sub signo Ecliptico.*

I shall now come to describe, and mention the *Eclipses* of this year, 1679. which although they are invisible as unto us, yet some of them will appear very great in the remote parts of the world: and their *effects* may be in some respect of consequence unto those places of *Europe*, under the *Constellations* wherein they happen: notwithstanding the *Eclipses* themselves be as unto them *Subterranean*.

An *Account* of the *Eclipses*, which happen in this *Year*, 1679.

THere will be four *Eclipses*, two of the *Sun* and two of the *Moon*, but none of them can be seen in our *Horizon*.

The *first* of them will be of the *Sun*, in the 21th degree of *Aries*, on the 31th day of *March*, about our 7 of the Cloek at night; and therefore cannot be seen of us, but in *New-*

France, and in and about the *Atlantique Ocean*, it will
very great and almost *total*.

The *second* in order is an *Eclipse* of the *Moon*, in the
degree of *Scorpio*, on the 15th day of *April*, at our ten
the Clock in the evening: but will hardly be seen of
but will appear unto such as sail on the *Baltique Ocean*,
in *Prussia*, *Dalmatia*, *Lapland*, *Hungary*, *Poland*, *&c.* it
be seen.

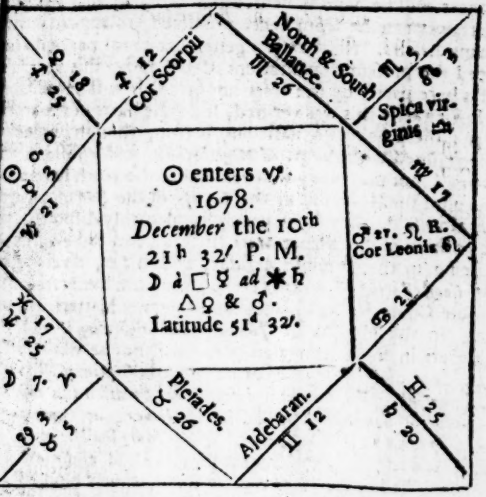
The *third Eclipse* is of the *Sun* in the 11th degree of
bra on the 24th day of *September* at our 6 of the Clock in
evening: but the *Sun* is then under our *Horizon*, and
not to be seen here, but it will be visible in the *Pacifi*
Ocean, *New-Zealand*, and in St. *Peters* Island, *&c.* w
it will be very great.

The *fourth* and last *Eclipse* of this year, will be of the M
in the 26 degree of *Aries*, on the 6th day of *October*, at
our 11 of the Clock beforenoon: and therefore cannot
seen of us, but this *Eclipse* will be visible, and also pre
great in the *Meridian* of our *Antipodes*.

I do now proceed to the *consideration* of the *positio*
Heaven at the *Suns* ingress into *Capricorn*, which will give
some discovery of the Grand Actions, concernments, a
casualties of the Months of *January*, *February*, and the
9 daies of *March*, in this present year——

And here I cannot omit (before I proceed any further
but repeat some of my *predictions*, for the last year, 16
(which were accordingly, then so clearly and truly ma
fested) as you shall find them inserted in the 10th page
the last *sheet* of my *Almanack* for that year, in the follow
words, *viz.*

"Here is an appearance of many Matters in hand, so th
" there will be divers Things of weighty concernment
" foot in some Countries of *Europe* in this year: yea even
" or about the *Spring time* thereof, relating both unto Se
" and Land Affairs. Many people will be then in great e
" pectation of what will be the event of sundry eminen
" Transactions, then upon the stage of the world; or t
" Agitation betwixt some particular Nations or Kingdoms—
"Th



" The truth is, many will be the endeavours of divers perſons to promote and eſtabliſh, a firm and ſetled peace in *Europe*: and many *Ambaſſadors* will be imployed for that purpoſe: and if there appear no cunning, and ſubtil deſigns to obſtruct it, ſuch a Thing may be probably in ſome meaſure effected, to the great content and ſatisfaction of moſt Countries of *Europe*: for there are attending this *ingreſs* ſeveral Conjunctions of the Planets which (as it now falls out) does in ſome meaſure intimate, the inclination of many people in the world to be at peace, and quiet: yet notwithſtanding (whatſoever at preſent the *Heavens* ſeem to declare) many diſcourſes there will be of " the various intentions and deſigns of ſome unſetled Nations " and people; and ſome will be labouring for peace, whileſt

" others will be wholly bent upon War, ſo that no
" certainty can be from hence predicted, to appear in
" many Affairs. Howbeit if a general and real peace do
" ceed the preſent Conflagrations of the *Spring* this year,
" it is here partly by the Stars imported) it will be well.

How exactly this was verified, let theſe parts of the w
judge: there being no judicious perſon, though but m
ly acquainted with the *grand Negotiations*, and *Affairs* o
laſt year, but may very well remember the truth hereo

As unto the Heavens, at the *Ingreſs* of the *Sun* into C
corn aforeſaid, they ſeem pretty moderately diſpoſed,
the poſition of the Planet *Mars* is ſomewhat to be diſli
as being in the 7th houſe *Angular*, and in *Leo*, a very h
nent Conſtellation of *Heaven*: and this doth intimate,
in ſome Countries and places ſome unquiet Matters will
pear, in the Months of *January* and *February*: and
Souldiers in ſome Forraign parts, will not be wholly
or rendred uſeleſs. *Quando Mars fuerit in Septima, eſt m
& damoſus, quia ſignificat inimicitias, & diſcordias ma
& accident hominibus furia, interfectiones, ac Contenti
multæ & rixæ in illo anno, &c.* When *Mars* ſhall be in th
houſe He denotes then great diſſentions and enmities,
that men ſhall be perplexed with Theft, much blood ſh
Contentions and Wars. There will be ſeveral Rencount
and Hoſtilities committed in thoſe Countries where Ar
are on foot. Much Robbing on the High-wayes; Thiev
and breaking into Houſes: The Merchants affairs may alſo
ſubject unto Interruptions —— In *Hungary* ſomewhat
Material may happen, and alſo ſomething, as in relation u
the *Spaniſh* Affairs —— Yea, even betimes in this ye
viz. at the beginning hereof, or in the Months af
ſaid.

Beſides, the Air will be now and then very Cold
Snowy, and divers Diſeaſes of the Nature of *Saturn*, *Ma*
and *Mercury*, will be ſomewhat prevalent: Colds, Coughs
Agues eſpecially (if not Diſeaſes of a hotter and higher
ture) will be very rife, or more than ordinary in many place
yea perhaps, even in *London*, *Oxford* and ſundry other places.

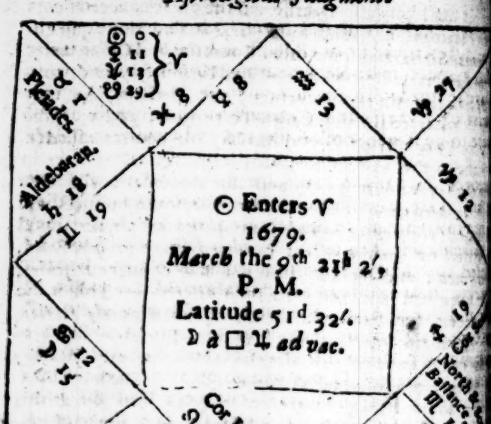
Diſ

ficulties are likely also to arise, in the great concernments some Nations, and if all things be, and continue quiet in *y*, *Rome*, *Sicily*, and some other Countries and Cities, under sign *Leo*, it will be well—— The *Turk* may prove trou- some, if not timely prevented, yet (perhaps) he may e somewhat to do in his own Territories; and with the *scovite*, *&c.* The *Sun* and *Mercury* are not far asunder, d both in the 12th house; this intimates *Obstructions* in ne weighty undertakings, and that discontent will seize on some *Men* of *Renoun* in the world: some business will managed *clandestinely*, and some *person* or *persons* found *se* in his, or their *trust*, or *command*, may be *questioned*, *imprisoned*: and such as shall *plot* and contrive *mischief*, ll be punished according to their *deserts*—— This is the ost material signification in brief, of the *Heavenly Bodies*, the aforesaid *Ingress* of the *Sun* into *Capricorn*, being as uch as concerns the two aforesaid Months, *viz. January* d *February*, of this year 1679——

I now come unto the *ingress* of the *Sun* into *Aries*, this esent year (at which time the *Spring* quarter doth *Astrono- ically* begin) and from the then position of Heaven, de- uce some observations of the principal matters, and things ortended—— to be made manifest in the world, in the *Spring* time of this *year*. The *vernal position* of *Heaven* being followeth——

There is a very serene position of *Heaven*, at the *Suns In- gress* into *Aries* this year, and the Stars do then in some measure shew themselves of a *propitious Nature*: so that in the general, we may from thence Conjecture, that Things will be carried on, in the *Spring* Quarter of this year, gent- ly, and in no extraordinary rough manner, and the minds of people will be then more inclined unto peace than War: and some *Nations* and *people*, formerly under Troubles, and Afflictions by the sword, will either now enjoy peace, or else their Affairs will be (by the help and means of their *Friends* and *Allies*) in a better Condition than in some years past——

The



The truth is, at the writing hereof, *viz.* near unto the beginning of *August*, 1678. Matters ſtand very dubious in ſeveral Countries, in theſe *European* parts of the world and people are with much ſeriouſneſs expecting what will be the iſſue and Event of the Grand Concernments now preſent on foot, which we leave for time to determine, and do ſay, that we doubt not, but that the good hand of *God* will ſo guide and direct the prudent undertakings of Councels in Chriſtendom, that thoſe great ſtirrs and Animoſities, ſo long on foot (or at leaſt ſome part of them) will be at an end this year, 1679. or appear leſs than formerly.

We have here Three Planets in *Aries*, *viz.* *Jupiter*, *Venus* and the *Sun*, and they and *Mercury* are in the 11th bound,

the great business of this *Spring* Quarter, would be to pose differences, or to establish and fix a right under-ding, betwixt some Neighbouring Nations. It is not usu-o have so many Planets in one house of *Heaven*, at the *olution* of a year, and therefore at this time it ought more to be taken notice of, and judiciously consider-

Moreover *Jupiter* and *Venus* are in *Conjunction*, and not er any material Affliction, except *combustion*: for they ng not fully distant 17 degrees from the *Suns* body, they st be acknowledged to be *sub radiis solis*, which is to be ounted at this time, some misfortune unto them, &c——

However, notwithstanding, this aforesaid *Conjunction* of *piter* and *Venus*, and the *Trine* of the *Sun* and *Mars*, just this *vernal ingress*, do seem to be of a propitious Nature d signification, unto the Affairs of those *Nations* concern-by the sign *Aries*. Things will go on amongst them in a y handsome and comfortable manner: And the *forces* d *people* of those *Countries*, under the said *Constellation*, ll Act their parts with Courage, and much Gallantry: d be blessed with good success in their undertakings. The ars by this their said present *position* do seem to have very uch relation unto the Affairs of *England*, (*England* being y all *Astrologers* reckoned to be under *Aries*) from hence we ay predict and not without great cause conjecture, that *is Majesties* Affairs will be carried on prosperously, and the *nglish* Nation will be victorious, and successful in their pub-ck designs and Negotiations: and His *Majestes* good and *oyal* Subjects, shall make their Enemies (if any shall this ear appear against them) sufficiently sensible of their va-our and courage, even in the *Spring* quarter of this year, 679.

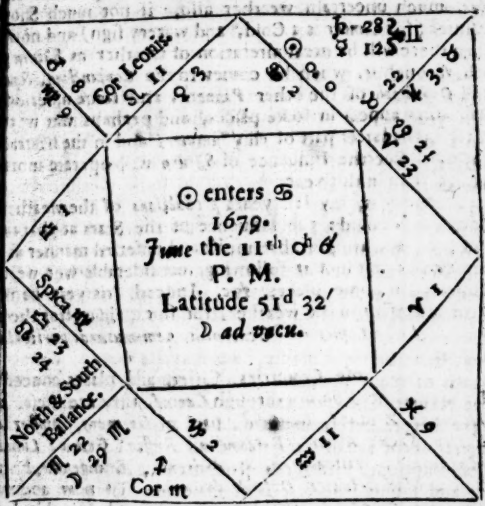
Besides as the *Sun* is now in the 11th house, *significat flo-entem & lætum statum plebis sub Magistratu, & dona regum ollicetur*. And *Mercury* also in the 11th *significat commodam & utilem amicitiam qua alter alteri benefacere studebit*——

Yet notwithstanding what hath been before herein deliver-d, the present Position of *Cauda draconis* in *Aries*, and in

that

that house, *viz.* the 11th is very much to be disliked doth intimate, that deceitful Actions and designs, matters of a cross, untoward and peevish dispositions will open in some of those Countries under that *Constellation* time in this year, and afterwards. And also the great *eclipse* of the *Sun*, in the 21th degree of that *sign*, in this year before mentioned, though not visible in parts of the world, may have some very main *effects*, wherein those Countries, Cities, and people the aforsaid Sign *Aries*, may be in some measure concerned — being *Germany*, *France*, *Sweden*, *Denmark*, some others which I do here omit mentioning ——

Saturn appears at this time, *viz.* at this vernal *Ingress* the Ascendant, and He is then Lord of the 8th house seems much to be disliked also, in regard his influences Is of a destructive Nature unto those Things and Persons concerned by the Ascendant (being *domus vitæ*) in so that from hence a sickly time may be feared, if not death of many people. Sundry considerable Differences the Nature of *Saturn* may appear, and they are such have before herein mentioned in my observations, at *ingress* of the *Sun* into *Capricorn*, *viz.* strange Colds; Consumptions, Phthisicks, Coughs, long lasting, and ling and pining Diseases, if not of some contagious quality Many common people, or the Commonalty of some sons, perhaps will be Malancholy, discontented, and malitious, and surly disposition: besides, the beginning the *Spring* will be somewhat backward, and cold: and Fruits of the Earth will not very early come forth. But the *Moon* is in *Cancer*, and in the second house, it may hoped, that it may prove a pretty comfortable Spring both as to the Farmer, and divers others of the Commonalty —— And so I approach to the *ingress* of the *Sun* into *Cancer* ——



What is most of all to be observed, at the Summer *Solstitial ingress* of this year, is, that the Planet *Saturn*, is just upon his removal out of *Gemini*, into *Cancer*; which he performeth on the 24th day of *June*, 13 dayes after the *Suns* Ingress into that *sign*: And this ought warily to be considered, for the removal of *Saturn* out of one sign into another, is accounted to be of some considerable signification, unto those Countries and Places, under the sign unto which he cometh. His Motion is slow and ponderous; being the highest Planet in the Heavens —— and therefore the more to be regarded, *&c.*

Some difficulties may arise, and appear towards the North —— (during the continuance of him in *Cancer*) and in Sea Affairs, and priviledges; if not about Fishing: and there

there may be very many Casualties, and Shipwrack &c. much uncertain weather also, if not much Winter (for *Cancer* is a Cold, and watery sign) and then there will be great alteration of weather as *Saturn* eth through it, when he comes to the *Conjunction*, and *Opposition* of the other *Planets*; and some unc Rains may appear in some places, and perhaps wet often in the latter part of this *Summer*, and in the W lowing. But the Influence of *Saturn* will operate 1680. than in this year.

The truth is, my last years *predictions* of the we *March* —— failed: the Influence of the Stars at th not then operating in that moist and unsetled manner expected: but in *May* following, considerable wet appeared in some places, &c. Indeed, 'tis very h give Judgment of the weather, for some time after t pearance of a *Comet* —— *Generalia, vim mutandi pari habent.*

As unto those Countries, Cities, and places co by the transit of *Saturn* through *Cancer*, they are the *Holland*, *Zealand*, *Scotland*, part of *Germany*, *Au Venice*, *Tunis*, *Algiers*, *Burgundia*, *Russia*, *Genoa*, *L Magdeburg*, *Wittenburgh*, St. *Andrews*, *Brandenburg East* and *West-Indies*, *Oxford*, &c.—— 'Tis now a years ago since his last coming into that sign before th on the 13th day of *May*, 1650. and he continued the about the latter end of *June*, 1652. Those that de know the Actions, and passages of those times, i Countries, and places under *Cancer* before mentioned, have recourse unto *Ratavius* his *History* of the world, into *English*, where in the *Appendix* and 10th *Book*, they receive satisfaction. I think it not very material time, to treat of the *ingress* of the *Sun* into *Libra*, regard I have before herein delivered fully, the chi ters of this year, signified by the Stars. *Vivat Rex Britannia.*

There was in 1678. *a* Prodigious Birth *of a Child at* Swanzey, *related in the* London Gazette *as followeth*, viz.

"*Swanzey April* the 15. On *Saturday* night last, a Woman was brought to Bed in this Town of a Female Child, "which had two perfect Heads and Necks upon one Body, "with Eyes, Nose, Ears and Mouth, very perfect on each "Face and Head, and the Body had all the Members per"fect; many hundreds saw the Child ere she was buried, "being born dead. *Such things as this are remarkable,*

Postscript *to the* Reader.

FOR these 26 years past, *viz.* ever since 1652. I have applyed my self unto the study of *Astrology* not only unto that part thereof, which concerns *Nativities*, but also unto all the known parts of the same. And in the year, 1656. now 22 years ago, my *Astrological Physitian* came forth in print (being a little piece) which found pretty kind acceptance. It's my intention ere long (if God shall spare my *life*) to put forth that Book again, with many *considerable* and *useful Additions*: And also a small piece of *Arithmetick*, after a *School* Method fitted for the meanest capacities. In the interim, I will only add thus much, *viz.* That *Choice discoveries*, or the *English Book of Fortune*, some years since wrote by me, is lately *printed* and *published*: Those that delight in works of that Nature, may find it worth their perusing.

Radwinter *near* Saffron Walden *in* Essex, August *the* 9th 1678.

William Andrews.
